### ***REASONS FOR ALLOWANCE***

Applicant's amendments, arguments and Declaration filed 04/17/07 is fully persuasive and is sufficient to overcome the 112 rejections of the prior office action. The following is an examiner's statement of reasons for allowance: The examiner has found claims 9-22 to be unobvious over the prior art of record and therefore to be allowable over the prior art of record. The present invention relates to a method of inhibiting the growth of pathogenic bacteria or the replication of herpes or influenza viruses in a patient comprising the step of administering to said patient an amount of an alpha-glycosidically linked starch polysaccharide derivative represented by a given general formula I, wherein said alpha-glycosidically linked starch polysaccharide derivative has a degree of quaternary ammonium group substitution of from 0.4 to 2.0. The prior art does not teach or suggest using applicant's starch polysaccharide derivative represented by a given general formula I to inhibiting the growth of the aforementioned conditions.
